## Overview

Golden Eagle (\$GE) is a community-driven memecoin built on the BNB Chain, symbolizing freedom, strength, and resilience. Our mission is to create a lasting ecosystem that blends meme culture with real-world financial utility. \$GE pioneers the adoption of USD1 (World Liberty Finance's stablecoin), a stablecoin backed by U.S. Treasuries. By integrating into DeFi protocols and payment systems. We aim to foster a strong, engaged community that drives long-term value for all holders.

## Mission and Vision

### Mission

To build a decentralized, community-led memecoin that rewards holders through financial incentives, governance rights, and real DeFi utility.

### Vision

To become the leading memecoin on the BNB Chain, backed by a strong community and established as a core utility token in the USD1 ecosystem through integrations, yield farming, and real-world applications.

## USD1 (WLFI) Integration

Golden Eagle supports and extends the adoption of USD1, a U.S. Treasury-backed stablecoin designed for long-term stability and real-world use.

### Key Integrations:

- Integration with USD1-based DeFi protocols for staking and yield farming
- Payment utility for micro-reward platforms
- Partnerships with USD1-aligned projects (e.g., Lista DAO)

### Expected Impact:

These partnerships and integrations will drive token demand, enhance price stability, and create practical use cases that bridge speculative meme investing with grounded financial systems.

## Token Details

- **Token Name:** Golden Eagle

- **Symbol:** \$GE
- **Blockchain:** Binance Smart Chain (BNB Chain)
- **Token Standard:** BEP-20
- **Total Supply:** 1,000,000,000 \$GE
- **Contract Address:** To be announced post-deployment.

#### Transaction Tax:

A 2% tax applies to all trades:

- 1% is directed to the liquidity pool
- 1% is redistributed to presale holders (if held)

#### Security Protections:

- Trade limits to deter whales
- Minimum time between trades
- Wallet caps to avoid centralization
- Anti-bot mechanics with one-trade-per-block logic

## Token Allocation (Tokenomics)

- **Presale Investors:** 44% (440M) — includes 400M for sale and a 10% bonus (40M)
- **Liquidity Pool:** 20% (200M) — paired with BNB and USD1 on PancakeSwap
- **Team:** 15% (150M) — locked for 12 months; 10% of listing gains shared with presale holders
- **Marketing & Development:** 10% (100M) — supports growth campaigns and listings
- **Community Rewards & Airdrops:** 6% (60M) — incentives, contests, staking
- **Reserve:** 5% (50M) — for future partnerships and liquidity

## Presale Details

- **Start Date:** May 28, 2025
- **End Date:** June 15, 2025
- **Presale Pricing Method:** The final token price will depend on the total funds raised and the amount of liquidity provided. While \$0.0005 per \$GE is a reference value, actual pricing will be determined by the initial liquidity pool ratio at launch. Contributors will receive tokens proportional to their share of the total presale amount.
- **Accepted Tokens:** USD1 (WIFI) or BNB
- **Contribution Limits:** \$10–\$2000 USD1 or 0.02–3 BNB
- **Hard Cap:** \$200,000

- **Presale Wallet:** 0xaf68568b2ff05F67D172CD0997d5cB88acADce07
- **Token Status:** Token will be created and deployed after the presale concludes
- **Distribution:** All tokens will be sent via MultiSender within 3–5 days of deployment

#### Use of Funds:

- Establish GE/BNB liquidity pool on PancakeSwap
- Launch DeFi features and marketing campaigns
- Secure listings on Binance, MEXC, and HTX
- Cover auditing, legal, and operational costs

## Benefits for Early Investors

Early contributors are more than just investors, they are **founding contributors** of the Golden Eagle project. As founding participants, they hold unique influence and access within the ecosystem.

These founding contributors enjoy exclusive financial and governance privileges:

- **10% Bonus Tokens** — additional \$GE during presale
- **1% Trading Tax Redistribution** — rewards for holding
- **50% Profit Share** — half of team listing gains shared
- **Monthly Airdrops** — loyalty rewards from the marketing pool
- **VIP Access** — private group, early news, 2× governance vote
- **Priority Airdrops** — half of future airdrops reserved for early holders
- **Staking Boost** — 15% APY vs. 10% public (launching October 2025)

## Roadmap

### Phase 1 (May 28 – May 30, 2025)

Launch early presale, initiate social outreach

### Phase 2 (June 1 – June 20, 2025)

Public presale, meme contests, airdrops, and community expansion. If the hard cap of \$200,000 is achieved, the presale will close early.

### Phase 3 (June 22 – June 24, 2025)

Create and deploy the \$GE token, distribute tokens to investor wallets, launch PancakeSwap trading pair, lock LP, initiate staking, and apply for CoinGecko/CMC listings.

#### Phase 4 (July 2025 – August 2026)

Expand DeFi integrations, launch yield farming and staking program, partner with USD1-aligned DeFi projects, and secure listings on major CEXs such as Binance, MEXC, and HTX.

### Governance and Adaptability

Golden Eagle embraces decentralized governance. Token holders vote on critical matters including fund allocation, roadmap revisions, and partnerships. Presale holders receive double voting power for minor proposals. The team reserves the right to propose adjustments based on legal, regulatory, or market changes. All major changes must pass a vote in the VIP governance group.

### Team and Transparency

- **Team Tokens:** 150M \$GE locked for 12 months
- **Updates:** Daily posts on X and Telegram
- **Transparency:** BscScan tracking, fund reports, and VIP governance

### Token Deployment & Delivery

Golden Eagle (\$GE) is currently in the presale funding stage. The token smart contract will be deployed after the presale ends.

#### Deployment Timeline:

- **Token Creation:** Within 3 days of presale close
- **Token Distribution:** Sent to contributors within 3–5 days via MultiSender
- **Official Contract Address:** Publicly shared and verified on BscScan
- **Contribution Tracking:** All presale transactions are visible in real-time on BscScan via the presale wallet link:

**Liquidity Risk:** LP tokens locked, 1% tax feeds LP automatically

## Legal Disclaimer

The Golden Eagle (\$GE) presale is a community crowdfunding initiative conducted prior to the creation of the \$GE token. By contributing, you acknowledge that you are supporting the launch of a decentralized, community-led crypto project. In return, you will receive \$GE tokens proportionally once the token is deployed following the presale.

This document and the presale process do not constitute an offer of securities or financial instruments under any jurisdiction. \$GE does not represent equity, company ownership, or claim over any legal entity. It is a utility token designed for participation, governance, and rewards within the Golden Eagle ecosystem.

We are building in the open, with transparency and community at the core. Your support helps shape the future of \$GE and the broader USD1 ecosystem.

## Conclusion

Golden Eagle (\$GE) is more than a meme, it's a mission-driven movement. Powered by community, transparency, and DeFi utility, \$GE delivers rewards, governance, and access to real-world stablecoin use cases. Early believers gain tangible benefits and the opportunity to help shape the future of finance on the BNB Chain.
